Website 2020 - Technology at RB

Technology at RB

The RB vision of technology is to support our culture of innovation, creativity and collaboration by providing access to technology that empowers students to be self directed, responsible and adaptable learners in our global and interconnected world – anytime and anywhere.

In all divisions technology is carefully incorporated into the curriculum to help deepen students' understanding of subjects and foster excitement as they create, problem solve and collaborate – while along the way becoming inquisitive learners and responsible digital citizens.

Students and faculty have access to a technology-rich learning environment at each division, which includes:

Kindergarten School

- iPads to assist in the collection of work samples and experiences, and creation of digital portfolios
- Cameras to record and share learning
- iPods and audio books to read along with those borrowed from the library
- Digital microscopes to explore living organisms from nearby forests and waterways

Primary School

- Mobile iPad and laptop carts to create flexible learning environments – anytime and anywhere
- Interactive whiteboards and projection devices in every classroom to support sharing and collaboration
- Suite of Google Apps for Education to create projects that support their units of inquiry

Tech Deck

On the RB Campus a support team staffs our Tech Deck – an open technology work space – to provide tech support throughout the day for students, faculty, staff and parents. Contact the Tech Deck via email techdeck@rb.edu.kw , or at +965 25239696 extension 111
